OFFICE OF TRAINING

DIRECTIVE

March 1954

COURSE: BIC(I)

SUBJECT: Intelligence Production

HOURS: 2½

25X1A

METHOD OF PRESENTATION: Demonstration & problem

INSTRUCTOR [REDACTED]

OBJECTIVES OF INSTRUCTION: To illustrate the principles of collection, processing, and dissemination by applying them to an intelligence problem; to emphasize methodology in processing raw information into useful intelligence.

SUMMARY OF PRESENTATION: A situation is outlined to set the stage for an intelligence problem involving collection, processing, and dissemination. The collection phase is reviewed and its solution provided to form the basis for an exercise in processing which requires selection, analysis, collation, synt esis, and final interpretation. The dissemination phase of the problem is solved by the students on the basis of supplied data. In conclusion the entire problem is reviewed to show how the criteria for determining accuracy of information (confirmation, coherence, credibility) were applied as the problem progressed.

SUBJECTS WITH WHICH COORDINATION IS REQUIRED: Scope and Perspective of Intelligence; Production of Current Intelligence; Intelligence Estimates.
